Members of the Public

Purpose:
Review proposed bridge design for culvert replacement damaged in August 2024 storm.

The reasoning behind all aspects of the design and construction phase staging requirements was explained by the engineer, Jon Ives. Attendees raised questions and concerns about the chain link fence proposed as drop-off protection. Suggestions were made regarding possible alternative materials, and/or the possibility of planting between the road and bridge wall to screen the fence. The attendees also requested the barrier fence be the minimum height allowed and therefore reduce the proposed height from 6' to 3'-6".

The site walk ended at 11:00 a.m.
